The Company's accumulation performance is after all expenses, tax, and the impact of the Company's gearing. Such items are not included in the S&P/ASX index.

Including the benefit of franking credits for shareholders who can fully utilise them, the Company's accumulation return for the year to 30 June 2017 was a rise of 19.5% compared to a rise of 15.9% in the S&P/ASX 200 Franking Credit Adjusted Total Return Index.

The Company's relative performance for the year was assisted by stock selection in the Resource, Financials and Healthcare sectors, and by its underweight positions in the Telecommunications and Real Estate sectors which fell 22% and 6% respectively. In Australian dollar terms the international portfolio also contributed modestly to outperformance.

Company Secretary
Appointed September 1991

Mr Hancock is also Company Secretary of Australian United Investment Company Limited (since 1995), has served as Chairman and is currently Secretary of the Australian Listed Investment Companies Association and is Chairman or a director of a number of private investment companies.

Operating and Financial Review

The principal activity of the Company is to take a medium to long term view and to invest in Australian equities, listed property trusts, international equities mainly through exchange traded index funds, and unlisted managed funds investing in Small Cap Australian equities. Investments may also be made from time to time in interest bearing securities or convertible notes. The directors have sought to invest in a diversified portfolio of investments with the objective of obtaining current income and longer term capital gain within an acceptable level of risk. There has been no significant change in the nature of the Company's activities during the financial year.

At 30 June 2017 Australian equities accounted for 88.5% and international equities 11.5% of the market value of the portfolio. Any foreign exchange currency exposure is currently unhedged.

For the year ended 30 June 2017 profit after tax before net gains and losses on the investment portfolio was \$32,800,000 (compared to \$30,506,000 in 2016) – an increase of 7.5%.

If special dividends received are disregarded, profit increased by 2.4%. In 2017, the profit after tax included \$1,820,000 of special dividends received (2016: \$246,000). The weighted average number of ordinary shares for the year was 208,179,034 as against 206,950,582 in the previous year, an increase of 0.6%.

The earnings per share was 14.9 cents excluding special dividends (2016: 14.6 cents), or 15.8 cents including special dividends (2016: 14.7 cents).

The net tangible asset backing of each of the Company's shares at 30 June 2017 was \$4.00 (2016: \$3.53). This net tangible asset backing calculation is based on investments at market value and is after tax on net realised gains, before any future tax benefit of net realised losses, and before estimated tax on net unrealised gains and losses, and before provision for the Company's final dividend. The Company is a long term investor and does not intend disposing of its total portfolio. If, however, estimated tax on net unrealised portfolio gains were to be deducted, the net tangible asset backing per share would have been \$3.47 (2016: \$3.14).

Bank borrowings as at 30 June 2017 were \$95 million (2016: \$95 million) amounting to 10% of the investment portfolio at market values (2016: 11%). Cash on hand, cash deposits and net short term receivables were \$30 million, or 3.2% of the investment portfolio at market values (2016: \$12 million or 1%). Annual interest expense was covered 9.2 times by profit before interest and tax (2016: 8.6 times).

Notes to the Financial Statements for the year ended 30 June 2017

1. Statement of significant accounting policies

Diversified United Investment Limited ("the Company") is a for-profit company domiciled in Australia. The financial report was authorised for issue by the directors on 17 August 2017.

(a) Statement of compliance

This financial report is a general purpose financial report which has been prepared in accordance with Australian Accounting Standards ('AASBs') (including Australian Interpretations) adopted by the Australian Accounting Standards Board ('AASB') and the Corporations Act 2001. The financial report of the Company also complies with International Financial Reporting Standards ('IFRSs') and interpretations adopted by the International Accounting Standards Board.

(b) Basis of preparation

The financial report is presented in Australian dollars. The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

The Company has early adopted AASB 9 Financial Instruments with initial application from 7 December 2009 (being the earliest date available for adoption). The Company has not applied any other Australian Accounting Standards that have been issued as at balance date but are not yet operative for the year ended 30 June 2017 ("the inoperative standards"). The effect of inoperative standards has been assessed and the effect has been identified as not being material. The Company only intends to adopt inoperative standards at the date at which their adoption becomes mandatory.

The financial report is prepared on a historical cost basis except that the investment portfolio is stated at its fair value.

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses.

(c) Investments

The Company is a long term investor. Under Australian Accounting Standards, the Company has elected to classify equity investments at fair value through other comprehensive income, as they are not held for trading. After initial recognition at fair value (being cost), equity investments are measured at fair value.

Unrealised gains or losses on equity investments are recognised in the Asset Revaluation Reserve until the investment is sold, collected or otherwise disposed of, at which time the cumulative gain or loss is transferred to the Asset Realisation Reserve.

The Company derecognises an investment when it is sold or it transfers the investment and the transfer qualifies for derecognition in accordance with AASB 9. Upon derecognition, unrealised gains/losses net of tax relating to the investment are transferred from the revaluation reserve to the realisation reserve.

Interest bearing investments are recognised at fair value and then measured at amortised cost. Amortised cost is calculated with any difference between cost and redemption value being recognised in the income statement over the period of the investment on an effective interest basis.

DIVERSIFIED UNITED INVESTMENT LIMITED

Notes to the Financial Statements for the year ended 30 June 2017

(d) Revenue from investment portfolio

The activity of the Company is that of an investment company, returns being in the form of dividends, interest income, trust income and option premiums. Dividend income is recognised in the income statement at ex-dividend date and all other income is recognised on an accruals basis. Special Dividends are those dividends received which have been designated as special and non-recurring by the declaring company.

(e) Taxation

The income tax expense or revenue for the period is the tax payable or receivable on the current period's taxable income based on the company tax rate adjusted by changes in deferred tax assets and liabilities which arise from items being brought to account in different periods for income tax and accounting purposes.

The expected tax on disposal of equity securities in the investment portfolio is recognised directly in the Asset Revaluation Reserve and as a deferred tax liability. When the Company disposes of such securities, tax is calculated on gains made according to the particular parcels allocated to the sale for tax purposes and offset against any capital losses carried forward. At this time, the tax recognised directly in the Revaluation Reserve is transferred to the Realisation Reserve. The associated deferred tax liability is similarly adjusted and transferred to current tax payable.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(f) Interest bearing borrowings

Interest bearing borrowings are recognised initially at fair value less attributable transaction costs.

Subsequent to initial recognition, interest bearing borrowings are stated at amortised cost with any difference between cost and redemption value being recognised in the income statement over the period of the borrowing on an effective interest basis.

(g) Ordinary Shares

Ordinary shares are classified as equity. Costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

DIVERSIFIED UNITED INVESTMENT LIMITED

Notes to the Financial Statements for the year ended 30 June 2017

1. Statement of significant accounting policies (continued)

(h) Foreign currency

Transactions in foreign currencies are translated into Australian dollars at the exchange rate at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated into Australian dollars at the exchange rate at the reporting date. Realised foreign currency gains or losses are generally recognised in profit or loss. However, foreign currency differences arising from the translation of available for-sale equity investments are recognised in Other Comprehensive Income.

The weighted average adjusted number of ordinary shares takes into account the shares issued in the dividend re-investment plan.

19. Capital Management

The Company's objective is to continue to provide shareholders with dividends and capital appreciation over the longer term within acceptable levels of risk.

The Company's capital will fluctuate with prevailing market movements and the Company may adjust the amount of dividends paid, issue new shares or sell assets to reduce debt.

The Company is not subject to any externally imposed capital requirements.

20. Financial Risk Management

AASB 7 – Financial Instruments: Disclosures identifies three types of risk associated with financial instruments (i.e. investments, receivables, payable and borrowings).

The Company has exposure to the following risks from its use of financial instruments:

- credit risk;
- liquidity risk; and
- market risk.

The Board of Directors has overall responsibility for the establishment and oversight of the risk management framework, and receives advice from the Audit and Risk Management Committee.

DIVERSIFIED UNITED INVESTMENT LIMITED

Notes to the Financial Statements for the year ended 30 June 2017

20. *Financial Risk Management (continued)*

Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The credit risk exposure of the Company lies principally in its cash and receivables to the extent of their carrying values and any accrued unpaid interest. Refer Notes 7 and 17.

Cash

The Company invests in cash management units with the MF Cash Management Fund and cash deposits with Australian banks, with a direct or underlying AA- credit rating assigned by Standard & Poor's, being a Recognised Rating Agency.

Receivables

Receivables are non-interest bearing and represent dividends, proceeds of sales and distributions yet to be received. The credit risk exposure of the Company in relation to receivables is the carrying amount.

Given the nature of the counterparties with which the Company deals management does not expect any counterparty to fail to meet its obligations. Additionally, none of these assets is overdue or considered to be impaired.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due.

The Company's approach to managing liquidity is to ensure that it will always have sufficient liquidity to meet its liabilities as they fall due. The Company monitors its cash flow requirements and ensures that it has cash or access to sufficient borrowing facilities to meet all its financial obligations as they fall due.

Bank Borrowings were \$95 million at the end of the financial year (2016: \$95 million) gearing the investment portfolio by 10% (2016: 11%). The Company has interest bearing loan facilities in place with the Australia and New Zealand Banking Group Ltd which includes fixed rate components. The facilities expire at various intervals through to 2 July 2022, unless renewed. Annual interest expense was covered 9.2 times by profit before interest and tax (2016: 8.6 times).

The major cash inflows for the Company include dividends, distributions, sales proceeds received and the proceeds from the issue of further shares to shareholders. The major cash outflows are the purchase of securities, interest expense and dividends paid to shareholders, which can be managed by the Company.

The Company's investments are quoted on a prescribed stock exchange and are able to be realised if required.

DIVERSIFIED UNITED INVESTMENT LIMITED

Notes to the Financial Statements for the year ended 30 June 2017

20. *Financial Risk Management (continued)*

Market Risk

Market risk is the risk that changes in market prices such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments.

Inherently, the Company is not free of market risk as it invests its capital in securities whose market prices can fluctuate.

Based on a tax rate of 30% (2016: 30%), a general movement in market prices of 5% and 10% would lead to an change in the Company's equity of \$31,493,000, or 4% (2016: \$28,533,000, or 4%) and \$62,986,000, or 9% (2016: \$57,067,000, or 9%) respectively.

Market risk is managed by ensuring that the Company's Australian investment portfolio is not overly exposed to one company or one particular sector relative to the S&P/ASX 200 index and the international portfolio is held through Exchange Traded Index funds invested across geographic regions and sectors. The Company's asset allocation, the relative weightings of the individual securities and the relative market sector weightings are reviewed by the Board at each Directors' meeting.

The Company also has exposure to interest rate risk on its borrowings as detailed in Note 21 which is minimised through conservative levels of gearing and ensuring that there is appropriate interest cover at all times.

21. *Financial Instruments Disclosure*

Interest Rate Risk

The Company's exposure to interest rate risk and the effective weighted average interest rate for classes of financial assets and financial liabilities which bear interest is set out below:

To the members of Diversified United Investments Limited

In our opinion, the accompanying Financial Report of the Company is in accordance with the *Corporations Act 2001*, including:

- giving a true and fair view of the Company's financial position as at 30 June 2017 and of its financial performance for the year ended on that date; and
- complying with *Australian Accounting Standards* and the *Corporations Regulations 2001*.

The **Financial Report** comprises:

- Balance sheet as at 30 June 2017
- Statement of profit or loss and other comprehensive income, Statement of changes in equity, and Statement of cash flows for the year then ended
- Notes including a summary of significant accounting policies
- Directors' Declaration.

Basis for opinion

We conducted our audit in accordance with *Australian Auditing Standards*. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report.

We are independent of the Company in accordance with *the Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants* (the Code) that are relevant to our audit of the Financial Report in Australia. We have fulfilled our other ethical responsibilities in accordance with the Code.

Liability limited by a scheme approved under Professional Standards Legislation.

Key Audit Matters

The **Key Audit Matters** we identified are:

- Valuation and existence of investment portfolio
- Completeness of deferred tax liability

Key Audit Matters are those matters that, in our professional judgement, were of most significance in our audit of the Financial Report of the current period.

These matters were addressed in the context of our audit of the Financial Report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation and existence of the investment portfolio (\$899,799,161)

Refer to Note 8 – Investment

The key audit matter

The Company's investment portfolio is \$899,799,161 which constitutes 97% of the Company's total assets as at 30 June 2017.

We do not consider the fair value of the investment portfolio to be judgemental in nature as it is mostly comprised of equity securities listed on the ASX. However, due to the size of the investment portfolio, valuation and existence is considered a key audit matter. It is an area which had the greatest effect on our overall audit strategy and allocation of time and resources in planning and completing our audit.

How the matter was addressed in our audit

Our procedures included:

- Documenting and assessing the processes in place to buy and sell equities in the portfolio, including the process to value the portfolio;
- Agreeing the valuation for the entire investment portfolio to externally quoted prices;
- Checking the number of shares or units in each equity investment for the entire investment portfolio to electronic share registry records; and

Completeness of deferred tax liability (\$109,675,114)

Refer to Note 4 – Taxation

The key audit matter

The Company's deferred tax liability is \$109,675,114 which constitutes 53% of the Company's total liabilities as at 30 June 2017.

The deferred tax liability relates to the expected tax on disposal of equity securities in the investment portfolio and is recognised in equity and as a deferred tax liability. The deferred tax liability is determined as the difference between the carrying amount of the investment portfolio as per the financial statements and the tax base recorded.

The Company's deferred tax assets are set off against the deferred tax liability arising on the unrealised gains on the equity investment portfolio in the Balance Sheet.

The completeness of the deferred tax liability is a key audit matter given it represents a significant portion of the total liabilities of the Company and involved the use of senior audit team members, including tax specialists.

How the matter was addressed in our audit

Our procedures included:

- Engaging KPMG tax specialists to review and assess the reasonableness of the deferred tax liability;
- Performing a proof of the deferred tax liability by reconciling the opening and closing deferred tax balances;
- Recalculating the deferred tax liability, including checking the valuation and accuracy of the market value of the investment portfolio and checking the tax base to the Company's investment register;
- Recalculating the closing tax cost base by adding the total purchases and sales of the year, stated at their tax cost base, to the opening balance of the equity portfolio and reconciling this to the Company's portfolio valuation report; and
- Assessing whether the deferred tax effects of significant or events identified during the audit, such as fair value or tax base adjustments, have been appropriately identified, calculated and recorded, as applicable.

Other Information

Other Information is financial and non-financial information in Diversified United Investments Limited's annual reporting which is provided in addition to the Financial Report and the Auditor's Report. The Directors are responsible for the Other Information.

Our opinion on the Financial Report does not cover the Other Information and, accordingly, we do not express an audit opinion or any form of assurance conclusion thereon, with the exception of the Remuneration Report and our related assurance opinion.

In connection with our audit of the Financial Report, our responsibility is to read the Other Information. Responsibilities of the Directors for the Financial Report

The Directors are responsible for:

- preparing the Financial Report that gives a true and fair view in accordance with *Australian Accounting Standards* and the *Corporations Act 2001*
- implementing necessary internal controls to enable the preparation of a Financial Report that gives a true and fair view and is free from material misstatement, whether due to fraud or error
- assessing the Company's ability to continue as a going concern. This includes disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Report

Our objective is:

- to obtain reasonable assurance about whether the Financial Report as a whole is free from material misstatement, whether due to fraud or error; and
- to issue an Auditor's Report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with *Australian Auditing Standards* will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error. They are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this Financial Report.

A further description of our responsibilities for the audit of the Financial Report is located at the *Auditing and Assurance Standards Board* website at: http://www.auasb.gov.au/auditors_files/ar1.pdf. This description forms part of our Auditor's Report.

Our responsibilities

We have audited the Remuneration Report included in pages 6 to 7 of the Directors' report for the year ended 30 June 2017.

Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with *Australian Auditing Standards*.
